FEATURES	Generally used for mowing steep slopes in safety on medium sized blocks up to 3-4 acres and where the terrain underfoot is not rough.	Used in more demanding applications where 4WD like performance is required on blocks around 3-5 acres. Designed for challenging conditions this machine is ideal for mowing less frequently. Mows short grass on flat areas very well.	Used in demanding applications on medium to large blocks where 4WD-like performance is required. Use in commercial applications is well proven and is often used by Shire councils for cleaning up rough, overgrown, steep areas.
